## JOEL'S TOMATOS PAGE 1

\*Determinate plants grow to a compact height. They stop growing when fruit sets, ripen all of their crop at the same time, and then die. Commonly known as bush tomatoes.

\*Indeterminate tomatoes continue to grow and produce tomatoes all along the stems until the first frost. They need support with a cage or trellis.

<b>Name (in alphabetical order)</b>	<b>Fruit Size</b>	<b>Color</b>	<b>Timing (days)</b>	<b>Determinate or Indeterminate*</b>	<b>Notes</b>
